eproo

COMPANY PROFILE
AS OF NOVEMBER 2026

Technical project experience. Systematically taken further.

eproo GmbH was founded in 2022 and is based in Bornheim, between Cologne and Bonn, Germany. Our foundation is our team's experience in the technical project management of defence projects since 2015. Two pillars build on this.

Defence project experience
since 2015

Process understanding
Bundeswehr and defence industry

Technical know-how
mobile, highly deployable infrastructure

Structured approach
based on the V-Modell XT

Strong network
established industry and manufacturing partners

AVAILABLE TODAY

Project management and project leadership

- Project leadership from initiation to completion
- Stakeholder management and steering of specialist partners
- Quality, change and configuration management
- Based on the V-Modell XT (German standard process model) or your own processes

IN DEVELOPMENT

Our own product family

Modular operational infrastructure for mobile and networked mission systems, in five product areas:

- 19-inch system modules
- Power modules
- Rugged 19-inch transit cases (BTuLB: operating, transport and storage containers) and integration modules
- Add-on modules
- Mobile carrier platforms

Development concepts. We will clarify the current status in a technical discussion.

SERVICES ACROSS THE ENTIRE LIFE CYCLE

Analysis
Capture conditions, evaluate solution paths, help shape concepts

Implementation
Specify, deliver and integrate with specialist partners, verify and hand over

In service
Logistic support, maintenance and further development to the agreed extent

OUR TEAM
